Mr. Bryan Hanson
President and Chief Nuclear Officer
Exelon Generation
4300 Winfield Road
Warrenville, IL 60555

Ms. Kathleen L. Barron
Senior Vice President
Exelon Generation
101 Constitution Ave., NW Suite 400 East
Washington, DC 20001

Mr. Brad Fewell
Senior Vice President
Exelon Generation
101 Constitution Ave., NW Suite 400 East
Washington, DC 20001

Mr. Frank Sturniolo
Site Vice President
Limerick Generating Station - Exelon
3146 Sanatoga Road
Pottstown, PA 19464

1 April 2020

Dear Mr. Hanson, Ms. Barron, Mr. Fewell and Mr. Sturniolo:

Thank you for your recent communication regarding the refueling of Limerick Generating Station; however, I still have concerns regarding this effort during this unprecedented public health crisis. Senate District 44 has been one of the most impacted areas in the outbreak of Covid-19. It is my job to communicate to my constituents, ensure public trust, and provide information regarding risks and guidance associated with this virus. I am disappointed with Exelon's lack of transparency and reluctance to be an active, honest community partner.

Thus far, Exelon has provided an inadequate pandemic response plan, withheld information from county and state officials, and failed to prioritize the safety of its employees, contract workers, community first responders, as well as all residents of the 44th senatorial district and entire region. This is grossly irresponsible as Exelon has brought at least 1,400 workers to the epicenter of Pennsylvania's Covid-19 pandemic.

In an effort to contain the spread of Covid-19 through Montgomery County and beyond, I am asking Exelon to do the following:

- Provide a complete list of worker accommodations. A previously provided list is incomplete. This list will ensure that first responders are geographically aware of potential risk of exposure to Covid-19 and better inform hospitality employees of the need to take precautions in the cleaning and service of lodgings.
- Work with federal, state, and county officials to create and implement a 14-day, controlled quarantine protocol for all contracted workers. Exelon should continue to fully compensate workers during this time and cover all costs incurred by workers during the quarantine.
- Continue to work with federal, state, county, and local officials throughout the refueling process, particularly improving transparency with regard to care of employees displaying symptoms of Covid-19, as requested by Congresswoman Dean and Commissioners Arkoosh and Moscovitz.

These requests are simply a call for corporate responsibility to ensure maximum preventative measures to ensure safety and reduce harm of both workers, their families, essential workers across the tri-county area.

It is my understanding that the plan is for many of these workers to move onto additional refueling projects, such as the scheduled Beaver Valley refueling project in western PA, as well as at other nuclear facilities across the country, and without proper safety and quarantine measures, we are risking a massive spread of Covid-19 across this state and nation.

By fulfilling these requests for increased mitigation, Exelon has an opportunity to right its wrongs and previous negligence, and demonstrate a commitment to protecting the health and safety of workers, their families and the community at large.

Sincerely,

A handwritten signature in black ink, appearing to read 'Katie Muth', with a long, sweeping horizontal line extending to the right.

Senator Katie Muth

D-44 - Berks, Chester, Montgomery County
